Design & Technology
Enrichment

At Leopold Primary School, we enhance our Design & Technology curriculum in a variety of engaging and interesting ways. We provide specialist support, where children have lessons taught by confident, skilled teachers, who provide projects that offer the children to learn valuable skills in all year groups. We focus on a range of topics such as food, structures, and mechanisms to ensure that our children get the most from our Design & technology curriculum.

Leopold Primary School supports children in Design & Technology using digital technology on websites such as Purple Mash and at home via Seesaw.

At Leopold Primary School, pupils use our innovative technology to support them with their learning, be it for research or taking pictures of their learning
